Academic research

Preparing for the application

Learn everything there is to know about applying for the Academic Research product track.

<https://developer.twitter.com/en/products/twitter-api/academic-research/application-info>

Kriteria

Are you eligible for the Academic Research product track?

New and existing Twitter developers need to complete an Academic Research application to access this track. You're encouraged to apply if you meet the following criteria:

- You are either a master's student, doctoral candidate, post-doc, faculty, or research-focused employee at an academic institution or university.
- You have a clearly defined research objective, and you have specific plans for how you intend to use, analyze, and share Twitter data from your research. **More about Project details here.**
- You will use this product track for non-commercial purposes. **More about non-commercial use here.**

If you don't meet all of the requirements above, the **Standard product track** might be a better fit.
